

CS 393
West Virginia University at Parkersburg
Co-Operative Education

Week 7 - Sept 30-October 6

Tasks:
New Team ramp-up

Technical Summary:
I started with a new team this week, and spent most of the week in meetings learning about the systems and digging through their source code. I also spent a little time looking at some of the alerts that we have set for monitoring our systems in production and validating that they were good for the people on my old team.

- Java
- Proprietary monitoring system
