

CS 393
West Virginia University at Parkersburg
Co-Operative Education

Week 6 - September 24-30

Tasks:

Testing with new properties

Debugging Service failures

Knowledge Transfers/Meetings.

Technical Summary:

I spent a lot of time running a series of tests on some of our servers with different properties, and validating that some older property sets were still valid.

I am transitioning to a new team, so I spent quite a lot of time ramping up the people who will be taking over for me on my old team.
