

May 20-26 - Week 1
Review & CS 393
West Virginia University at Parkersburg
Co-Operative Education

Week 9 - July 15-21

Tasks:

Begin technology review of previous prototypes

Discussions of technology choices and current validity

Evaluation of previous prototypes - what to keep - Java libraries in use, API's, messaging protocols.

Migrate git repository from private to managed

Meetings to discuss overall architecture

Technical Summary:

This week I spent a lot of time evaluating java code and libraries and their use in a current prototype. I looked at several different open source libraries and their uses. I also spent some time working with the source control repository that was previously used. I cleaned it up and unified some of the structures in the project, and migrated the source from a private repository to our Apple-managed repository.

- Git
- Java
- Several Java based open source libraries
