

CS 393
West Virginia University at Parkersburg
Co-Operative Education

Week 9 - October 14-20

Tasks:

Monitor Data Sweeping
Debug slow network performance
Push properties changes

Technical Summary:

This week I did a lot of monitoring servers - we were running some sweeps to find different kinds of data, and we pushed a set of property changes that required me to monitor the health of servers.

In addition, I spent one day trying to find out whether a slowdown was in our application or in a related web application that we use.

- Java
- Proprietary Monitoring tools
- snoop
