

CS 393
West Virginia University at Parkersburg
Co-Operative Education

Week 5 - June 17-23

Tasks

Start work on new Project

Pull code for prototype, read tests

Read wiki, run tests,

Start pulling apart code - reading it, learning overall architecture of prototype

Fight with perl - 64bit but trying to execute against 32 bit dynlib

Meetings.

Technical Summaries:

This week I began work on a new project at work. I spent the week getting familiar with the work done on a previous prototype for this project, and the assorted unit tests. I also spent some time fighting with one of my perl configurations.

- Perl
- JUnit
- Java, IntelliJ
