

CS 393
West Virginia University at Parkersburg
Co-Operative Education

June 10-16 Week 4

Tasks:

WWDC Conference!

Worked Labs to assist end-users with understanding Application API's.

Spoke as part of panel.

Attended sessions on new API's

Meetings to discuss existing status of old project, hand-off.

Technical Summaries:

I spent this week at Apple's WWDC conference. My primary role was to work at several labs that deal with my related features. I assisted developers on understanding our public API's and code. I also attended sessions by other Apple engineers to learn about new API's and Objective-C libraries that are being introduced.

- Objective-C

- iCloud internet protocols
