

CS 393  
West Virginia University at Parkersburg  
Co-Operative Education

Week 14 - November 18-24

Tasks:

Debug slow storage issues  
Review & Document dependencies for new project  
Start cross-functional meetings for new feature

Technical Summary:

This week I encountered an issue where some of our persistent storage was very slow. I spent a day working with our SA's and another dev debugging it, and proposing solutions.

We started a cycle for a new feature, so I attended several meetings where we brainstormed and documented ideas for it.

Finally, I had to review some of the dependencies for my new team and document them for everyone.

- linux & nfs
- OmniGraffle (Visio)
- Confluence & Wiki
- bash scripting
