CS 393
West Virginia University at Parkersburg
Co-Operative Education

Week 11 - July 29-Aug 4
Tasks:
Lots of odds and ends - follow up with EPM to get machines provisioned
Work with SA's to get machines configured correctly and handed off to infrastructure group for infrastructure installs
Write application configurations for test environments.
Lots of meetings to break down data structures and data routing/delivery architecture at high and mid level.
Work with support group to track down lingering issue with unavailable data.
Cross-functional team meetings regarding new features for next major release.

Technical Summary:
This week I spent a fair amount of time doing design work on specific parts of the project's architecture. I had a lot of meetings with other members of our team to discuss and refine the project. I also spent some time working with a separate group to determine some of our infrastructure needs.

- Proprietary Build/Deployment system
- Proprietary Systems Administrations tools.
