CS 393
West Virginia University at Parkersburg
Co-Operative Education

Week 6 - June 24-30

Tasks:
Figure out keychain issue with keberos/OpenDirectory.
Upgrade/Install new XCode, iOS/OSX tools
Pull sample app for iOS7 and do compile/run.
Wade through logs for DR testing, compare to DR playbook.
Half day investigating speed regressions from previous build - timeouts from external services.

Technical Summary:
This week I worked on upgrading some of my programming tools to new versions. I also was granted access to a piece of code for review, so I spent some time working with XCode and iOS. I spent a lot of time reviewing logs from different events to determine if things were working correctly.

- XCode
- Objective C
