CS 393
West Virginia University at Parkersburg
Co-Operative Education

June 3 - 9 - Week 3

Tasks:
Review documentation and code for new library produced by our team.
Meetings to review client-server interaction for older document store
Meetings to discuss logjam in source control system
Meetings to discuss who's going to work on new persistence layer.

Technical Summaries:

This week my tasks revolved primarily around meeting with several groups about multiple outstanding issues, both technical and personnel based. I read some documentation on a new feature, and reviewed some of the related code.

- Confluence/Wiki formatting and documentation
- Java
