Co-Operative Education

August 19-25 - Week 1

Tasks:
Review & Catalog This week's bugs
Debug Environment issues
Document required test cases for current project
Review & Document DR procedures for multiple service.

Technical Summary:

This week my tasks included a triage of accumulated bugs, and dividing them up into appropriate milestones.
I spent two days debugging an issue in one of our test environments that caused multiple server systems to be unable to route to each other.
I began a review of some of our Disaster Recovery procedures for several of our services.

- Bug Tracking System (Proprietary)
- Source Control (Subversion)
- Programming/Debugging (Java, IntelliJ)
- Network tools - Charles Proxy, curl.
